

## 2500-IADP I/O Adapter for Series 500

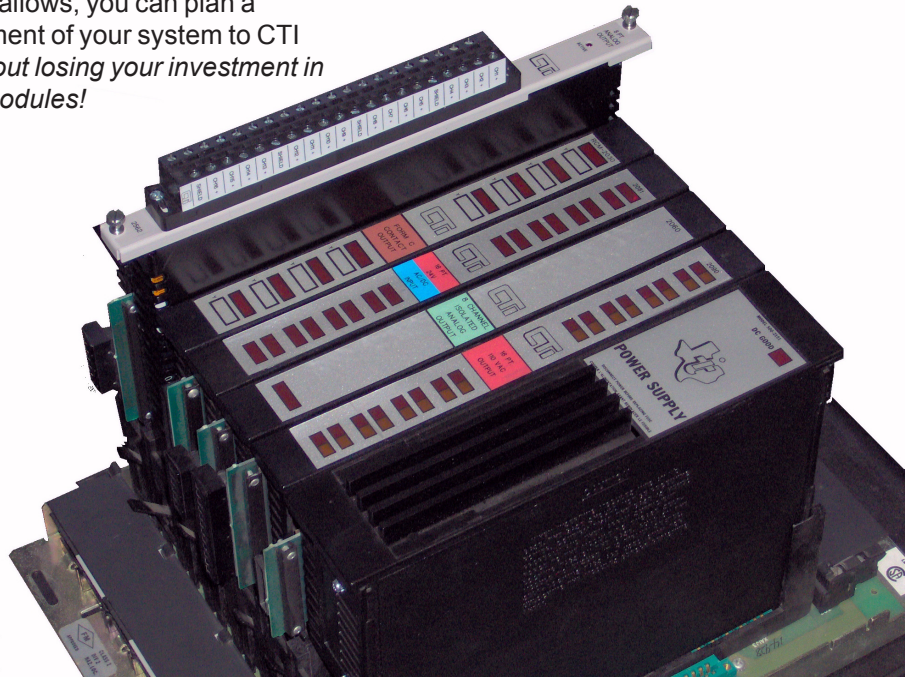

### Features

- Series 500 base format
- Provides mechanical and electrical adaptation of CTI 2500 series I/O modules to operate in a Series 500 base
- Compatible with all CTI 2500 Series discrete and analog I/O modules
- Allows replacement of failed Series 500 I/O modules with inexpensive and widely available CTI 2500 Series modules
- Allows you to plan system upgrade according to your budget
- Preserves your investment in replacement modules
- Can be used with a CTI ethernet module to provide ethernet connectivity for Series 500 bases (note: special ethernet module required - contact CTI for information)

### Description

The 2500-IADP is an I/O Adapter which allows the use of CTI 2500 Series I/O modules in Texas Instruments Series 500 I/O bases. It provides a transparent path for upgrading old Series 500 systems without the requirement to completely replace the system.

Failed 500 Series I/O modules can be replaced with CTI 2500 Series modules. Then, when your budget allows, you can plan a complete replacement of your system to CTI 2500 Series - *without losing your investment in the replaced I/O modules!*

**Control Technology Inc.**
